(a) 8x8
$E/N + 0.4988$ (10^{-5})
variance σ^2/N (10^{-4})
RBM+PP (Nomura-Imada)
Hu et al. 2013, extrap.
ViT, Lanczos p = 0, 1
variance extrapolation
(b) 6x6, exact (calibration)
$(E - E_0)/N$ (10^{-5})
variance σ^2/N (10^{-4})
two-point line (p = 0, 1)
exact E0
Lanczos p = 0, 1, 2 (optimal)
p = 2, repeated step
