(a) energy; 6×6, J2/J1 = 0.5, start: symmetrised ViT
ideal loop ⟨H⟩ (exact FN amplitude)
our loop ⟨H⟩ (network write-back)
our loop E_{FN}
RBM+PP (best published)
energy above exact E_0, per site
10^{-4}
5×10^{-5}
2×10^{-5}

(b) sign error
ViT (unprojected)
wrong-sign weight w_s (exact, ψ_0^2-weighted)
10^{-4}
10^{-5}
10^{-6}
ideal loop (exact FN amplitude, Krylov sign)
our loop, Krylov sign
our loop, before the Krylov step
